Brisbane, QLD, Australia 

As a software engineer with over three decades of hands-on experience, I bring a rich breadth and depth of knowledge and expertise. My passion for technology keeps me ahead of industry trends, leading to my advocacy and early adoption of transformational ideas such as DevOps, functional programming, agile, and object-oriented programming. I approach my work with enthusiasm, humour, and common sense, fostering a positive and productive team environment.

I specialise in writing clean, reliable code and excel at problem-solving and troubleshooting. Recently, I've been a backend-focused engineer who also takes care of DevOps concerns and often site reliability. However, I'm a generalist and am happy developing on the frontend too. I've largely been using Haskell for the last 7 years; before that Java for 15 years, and at the start of my career, I did C and C++ for 10 years. Recently, I've been upskilling in Java, Scala, Kotlin, and Rust and the web frameworks, Spring Boot and Axum.

- Languages: Java, Scala, Kotlin, Haskell, Rust, Go, TypeScript.
- Cloud: GCP, AWS.
- Container Orchestration: Kubernetes, ECS.
- CI/CD: GitHub, CircleCI, GitLab, Bitbucket, Jenkins.
- Infrastructure as code: Terraform, Pulumi, Helm, Nix.
- Application Performance Monitoring: Datadog, New Relic.
- Functional programming enthusiast.
- I love to work with Continuous Delivery and Deployment.
- DevOps: Embraces "you build it, you run it" approach.
- Trusted mentor for technical advice and personal support.

Domains

Startups, Finance, Travel,
Telecommunications, and
Government

Cloud Platforms

Google Cloud

Building, deploying, and
operating applications on
Kubernetes with GKE and
Compute Engine

Amazon Web Services

Event-driven architectures with
microservices built on Lambda,
ECS, SQS, SNS, RDS, Postgres,
and DynamoDB

Tech Stacks

Backend/Data/Messaging

Postgres, MySQL, Redis,
RabbitMQ, DynamoDB, Oracle
RDBMS, Sybase, SQL Server

Experience

Senior Software Engineer

TLC SRC • 2003 – Present

Independent contractor working with various client including Tweag, Betterteam, FlightCentre, Suncorp, TNS, Eiger Systems (now Experian), JP Morgan Chase, T-Mobile UK, Optus, and Transcore. Working across the software development lifecycle—from coding and testing to deployment and site reliability.

Using skills including Java, Scala, Haskell, open-source, functional programming, DevOps, Cloud, Kubernetes, TypeScript, Go, C#, .NET, Python, Terraform, and Nix.

Principal Software Engineer

Ephox (now Tiny) • 2013 – 2014 • tiny.cloud

Building rich-text editors for the web using skills including Java, Scala, JavaScript, TypeScript, functional programming, microservices, DevOps, and Postgres.

Senior Technical Software Developer

ADC (now CSG International) • 1999 – 2003 • csgi.com

Highly customisable billing and CRM solutions for the mobile telecommunications industry. Using skills including C, C++, Java, BEA Tuxedo, BEA WebLogic, and Oracle RDBMS.

Java

Spring, Hibernate, Java SE, Java EE, Jakarta EE, EJB, JPA, Servlets, JSF, JSP, JUnit, Apache Camel, Liquibase, IntelliJ

Scala

Scalaz, Slick, Play Framework

Haskell

Yesod, Persistent, Servant, Hspec, Tasty

CI/CD

GitHub, Bitbucket, CircleCI, GitLab, Jenkins

Infrastructure as Code

Terraform, Pulumi, Helm, Nix

Frontend

TypeScript, JavaScript, HTML, CSS, Ember.js, Angular, jQuery

Education

Queensland University of

Technology

Master of Information Technology

2000 – 2004

GPA: 6.0/7.0

Queensland University of

Technology

Bachelor of Applied Science

(Computing)

1989 – 1992

GPA: 5.2/7.0

Senior Analyst Programmer

Dialog (now NCS) • 1993 – 1998 • [ncs.co](https://www.ncs.co)

Consulting at various clients using skills including C, C++, Ingres, Oracle, and shell scripting.

Analyst Programmer

CITEC • 1990 – 1992 • [citec.com.au](https://www.citec.com.au)

Working as an intern using skills including C, Ingres, and DCL.

Professional Development

Kotlin for Java Developers

JetBrains, Coursera • Jul, 2023

Engineering Chapter in Technical Leadership

Folklore Ventures • May, 2023

Type-level programming with GHC

Andres Löh, Well Typed • Oct, 2019

Scalable Microservices with Kubernetes

Kelsey Hightower, Google • Feb, 2017

Real-time Stream Processing with Rx

Erik Meijer & Brian Beckman • Dec, 2012

Functional Programming Principles in Scala

Martin Odersky, EPFL • Nov, 2012

Advanced Scala

Miles Sabin, Chuusai • Oct, 2012

Compilers

Alex Aiken, Stanford • Jun, 2012

Introduction to Scala

Workingmouse • Sep, 2008
