Brisbane, QLD, Australia

As a software engineer with over three decades of hands-on experience, I bring a rich breadth and depth of knowledge and expertise. My passion for technology keeps me ahead of industry trends, leading to my advocacy and early adoption of transformational ideas such as DevOps, functional programming, agile, and object-oriented programming. I approach my work with enthusiasm, humour, and common sense, fostering a positive and productive team environment.

I specialise in writing clean, reliable code and excel at problem-solving and troubleshooting. Recently, I've been a backend-focused engineer who also takes care of DevOps concerns and often site reliability. However, I'm a generalist and am happy developing on the frontend too. I've largely been using Haskell for the last 7 years; before that Java for 15 years, and at the start of my career, I did C and C++ for 10 years. Recently, I've been upskilling in Java, Scala, Kotlin, and Rust and web frameworks such as Spring Boot and Axum.

- Languages: Java, Scala, Kotlin, Haskell, Rust, Go, TypeScript.
- Cloud Platforms: GCP, AWS.
- Container Orchestration: Kubernetes, ECS.
- CI/CD: GitHub, CircleCI, GitLab, Bitbucket, Jenkins.
- Infrastructure as code: Terraform, Pulumi, Helm, Nix.
- Application Performance Monitoring: Datadog, New Relic.
- Functional programming enthusiast.
- I love to work with Continuous Delivery and Deployment.
- DevOps: Embraces "you build it, you run it" approach.
- Trusted mentor for technical advice and personal support.

Domains

Experience

Startups, Finance, Travel, Telecommunications, and Government

Senior Software Engineer

TLC SRC • 2003 - Present

Cloud Platforms

Google Cloud

Building, deploying, and operating applications on Kubernetes with GKE and Compute Engine

Independent contractor working with various clients including Tweag, Betterteam, FlightCentre, Suncorp, TNS, Eiger Systems (now Experian), JP Morgan Chase, T-Mobile UK, Optus, and Transcore. Working across the software development lifecycle—from coding and testing to deployment and site reliability. Employed skills including Java, Scala, Haskell, open-source, functional programming, DevOps, Cloud, Kubernetes, REST APIs, TypeScript, Go, C#, .NET, Python, Terraform, and Nix.

Amazon Web Services

Event-driven architectures with microservices built on Lambda, ECS, SQS, SNS, RDS, Postgres, and DynamoDB

Principal Software Engineer

Ephox (now Tiny) • 2013 – 2014 • tiny.cloud

Building rich-text editors for the web using skills including Java, Scala, JavaScript, TypeScript, functional programming, microservices, DevOps, and Postgres.

Tech Stacks

Backend/Data/Messaging Postgres, MySQL, Redis, RabbitMQ, DynamoDB, Oracle RDBMS, Sybase, SQL Server

Senior Technical Software Developer

ADC (now CSG International) • 1999 – 2003 • csgi.com

Highly customisable billing and CRM solutions for the mobile telecommunications industry. Using skills including C, C++, Java, BEA Tuxedo, BEA WebLogic, and Oracle RDBMS.

Java

Spring, Hibernate, Java SE, Java EE, Jakarta EE, EJB, JPA, Servlets, JSF, JSP, JUnit, Apache Camel, Liquibase, IntelliJ Senior Analyst Programmer

Dialog (now NCS) • 1993 – 1998 • ncs.co

Consulting at various clients using skills including C, C++, Ingres, Oracle, and shell scripting.

Scala

Scalaz, Slick, Play Framework

Analyst Programmer

CITEC • 1990 - 1992 • citec.com.au

Haskell

Yesod, Persistent, Servant, Hspec, Tasty Working as an intern using skills including C, Ingres, and DCL.

CI/CD

GitHub, Bitbucket, CircleCI, GitLab, Jenkins

Professional Development

Kotlin for Java Developers

Infrastructure as Code Terraform, Pulumi, Helm, Nix JetBrains, Coursera • Jul, 2023

Frontend Engineering Chapter in Technical Leadership

Folklore Ventures • May, 2023

TypeScript, JavaScript, HTML, CSS, Ember.js, Angular, jQuery

Type-level programming with GHC

Education Andres Löh, Well Typed • Oct, 2019

Queensland University of

Technology

Master of Information Technology 2000 – 2004

GPA: 6.0/7.0

Scalable Microservices with Kubernetes

Kelsey Hightower, Google • Feb, 2017

Real-time Stream Processing with Rx

Erik Meijer & Brian Beckman • Dec, 2012

Queensland University of

Technology

Bachelor of Applied Science (Computing)

1989 – 1992 GPA: 5.2/7.0 Functional Programming Principles in Scala

Martin Odersky, EPFL • Nov, 2012

Advanced Scala

Miles Sabin, Chuusai • Oct, 2012

Compilers

Alex Aiken, Stanford • Jun, 2012

Introduction to Scala

Workingmouse • Sep, 2008
