Brisbane, QLD, Australia

As a software engineer with over three decades of hands-on experience, I bring a rich breadth and depth of knowledge and expertise. My passion for technology keeps me ahead of industry trends, leading to my advocacy and early adoption of transformational ideas such as DevOps, functional programming, agile, and object-oriented programming. I approach my work with enthusiasm, humour, and common sense, fostering a positive and productive team environment.

I specialise in writing clean, reliable code and excel at problem-solving and troubleshooting. Recently, I've been a backend-focused engineer who also takes care of DevOps concerns and often site reliability. However, I'm a generalist and am happy to develop on the frontend too. I've largely been using Haskell for the last 7 years; before that Java for 15 years, and at the start of my career, I did C and C++ for 10 years. Since being laid off last year, I've been updating my skills in Java, Scala, Kotlin, Rust and Java-based web frameworks: Spring Boot, Micronaut, and Quarkus.

- Languages: Java, Scala, Kotlin, Haskell, Rust, Go, TypeScript.
- Cloud: GCP, AWS.
- Container Orchestration: Kubernetes, ECS.
- CI/CD: GitHub, CircleCI, GitLab, Bitbucket, Jenkins.
- Infrastructure as code: Terraform, Pulumi, Helm, Nix.
- Application Performance Monitoring: Datadog, New Relic.
- Functional programming enthusiast.
- I love to work with Continuous Delivery and Deployment.
- DevOps: Embraces "you build it, you run it" approach.
  Trusted mentor for technical advice and personal support.

### **Domains**

# Experience

Nix.

Startups, Finance, Travel, Telecommunications, and Government

### Cloud Platforms

#### Google Cloud

Building, deploying, and operating applications on Kubernetes with GKE and Compute Engine

#### **Amazon Web Services**

Event-driven architectures with microservices built on Lambda, ECS, SQS, SNS, RDS, Postgres, and DynamoDB

## Principal Software Engineer

Senior Software Engineer

TLC SRC • 2003 - Present

Ephox (now Tiny) • 2013 - 2014 • tiny.cloud

Building rich-text editors for the web using skills including Java, Scala, JavaScript, TypeScript, functional programming, microservices, DevOps, and Postgres.

Independent contractor working with various client including Tweag, Betterteam, FlightCentre, Suncorp, Eiger Systems (now Experian), JP Morgan Chase, T-Mobile

UK, TNS, Transcore, and more. Working across the software development lifecycle

Using skills including Java, Scala, Haskell, open-source, functional programming,

DevOps, Cloud, Kubernetes, TypeScript, Go, C#, .NET, Python, Terraform, and

### **Tech Stacks**

Backend/Data/Messaging Postgres, MySQL, Redis, RabbitMQ, DynamoDB, Oracle RDBMS, Sybase, SQL Server

## Senior Technical Software Developer

ADC (now CSG International) • 1999 – 2003 • csgi.com

—from coding and testing to deployment and site reliability.

Highly customisable billing and CRM solutions for the mobile telecommunications industry. Using skills including C, C++, Java, BEA Tuxedo, BEA WebLogic, and Oracle RDBMS.

Java

Spring, Hibernate, Java SE, Java EE, Jakarta EE, EJB, JPA, Servlets, JSF, JSP, JUnit, Apache Camel, Liquibase, IntelliJ

Scala

Scalaz, Slick, Play Framework

Haskell

Yesod, Persistent, Servant, Hspec, Tasty

CI/CD

GitHub, Bitbucket, CircleCl, GitLab, Jenkins

Infrastructure as Code

Terraform, Pulumi, Helm, Nix

Frontend

TypeScript, JavaScript, HTML, CSS, Ember.js, Angular, jQuery

Education

Queensland University of

Technology

Master of Information Technology 2000 – 2004

GPA: 6.0/7.0

Queensland University of

Technology

Bachelor of Applied Science (Computing)

1989 – 1992 GPA: 5.2/7.0 Senior Analyst Programmer

**Dialog (now NCS) •** 1993 – 1998 • ncs.co

Consulting at various clients using skills including C, C++, Ingres, Oracle, and shell scripting.

**Analyst Programmer** 

CITEC • 1990 - 1992 • citec.com.au

Working as an intern using skills including C, Ingres, and DCL.

**Professional Development** 

Kotlin for Java Developers

Jetbrains, Coursera • Jul, 2023

**Engineering Chapter in Technical Leadership** 

Folklore Ventures • May, 2023

Type-level programming with GHC

Andres Löh, Well Typed • Oct, 2019

Scalable Microservices with Kubernetes

Kelsey Hightower, Google • Feb, 2017

Real-time Stream Processing with Rx

Erik Meijer & Brian Beckman • Dec, 2012

Functional Programming Principles in Scala

Martin Odersky, EPFL • Nov, 2012

**Advanced Scala** 

Miles Sabin, Chuusai • Oct, 2012

Compilers

Alex Aiken, Stanford • Jun, 2012

Introduction to Scala

Workingmouse • Sep, 2008
